Krzysztof Drewniak

https://kdrewniak.com | krzysdrewniak@gmail.com | +1 214-315-4811
3401 S Lamar Blvd. Apt 2206 Austin, TX 78704-2653; US and EU citizenship

Objective Not currently looking, but want a more up to date resume

EDUCATION

UNIVERSITY OF WASHINGTON
PhD in Computer Science
Sep 2018-Mar 2021 (indefinite pause)
Seattle, WA | Master's Degree: December 2020

UNIVERSITY OF TEXAS AT AUSTIN
BS in Computer Science | Turing Scholars Honors Program | BS in Pure Mathematics
Aug 2014–May 2018 | Austin, TX

TEXAS ACADEMY OF MATHEMATICS AND SCIENCE
Early college program | University of North Texas
Aug 2012–May 2014 | Denton, TX

SKILLS

PROGRAMMING
Significant experience:
MLIR/LLVM • Python • C/C++ • Rust • Haskell • Common Lisp • Erlang

Some experience:
Assembly • Ruby (Rails) • JavaScript & jQuery • Java • Coq

OTHER TECHNICAL
High-Performance Computing • Compilers • Optimization • Linux • SQL • Machine Learning • Distributed systems • Jenkins

NON-TECHNICAL
Technical writing • Open source

GITHUB PROJECTS

SWIZZZLEFLOW
Accelerator kernel synthesis.

RUST-KERNEL
Proof-of-concept teaching OS in Rust.

PPC-BOARD-2.0
Modernized rewrite of an unusual forum system in Ruby on Rails.

EXPERIENCE

AMD Machine Learning Compiler Engineer
May 2021–Present | Austin, TX
- Spearheaded new features in open source machine learning compiler
- Incorporated original research to improve model performance

GOOGLE | Software Engineering/Research Intern
Jun 2019–Aug 2019 | Mountain View, CA
- Began research on optimizing accelerator loop nests using dynamic programming
- Implemented Tensorflow Lite importer for the MLIR compiler

MICROSOFT | Software Engineering Intern, AI & Research
Jun 2017–Aug 2017 | Bellevue, WA
- Developed deep learning models for Bing Maps auto-suggest
- Produced significant projected improvements in result quality

TRUECAR | Software Engineering Intern
Jun 2016–Aug 2016 | Austin, TX
- Developed machine learning solution to combat lead spam
- Collaborated across remote teams to source data

RESEARCH

SWIZZLEFLOW, PROGRAM SYNTHESIS GROUP
August 2018–March 2021 | Seattle, WA
Designed and created Swizzleflow, a system for representing and synthesizing optimized kernels for accelerators with Dr. Ras Bodik.

ELECTRICAL AND COMPUTER ENGINEERING
February 2018–June 2018 | Pittsburgh, PA
Developed, with Dr. Tze Meng Low, an automated high-level loop fusion analysis method based on loop invariants for linear algebra algorithms.

HIGH-PERFORMANCE AND AUTOMATIC COMPUTING
September 2017–January 2018 | Aachen, Germany
With Prof. Paolo Bientinesi, investigated methods for the automatic generation of code to efficiently normalize linear algebra expressions from axioms.

SCIENCE OF HIGH-PERFORMANCE COMPUTING GROUP
September 2016–May 2018 | Austin, TX
Worked with Dr. Robert Van De Geijn to optimize the matrix operation $D+ = ABC$ and create techniques for optimizing similar kernels.

TEACHING

Domain-specific languages, Winter 2020 Led recitations, wrote exams, and independently unproved grading infrastructure.

Computer Architecture, Spring 2016 Developed new assignments, including a teaching compiler to introduce C and assembly.
